# CAESAR KLEBERG WILDLIFE RESEARCH INSTITUTE

TEXAS A&M UNIVERSITY-KINGSVILLE

# 2018 ANNUAL GIVING REPORT

Providing the science behind wildlife conservation and management.

# THANK YOU TO OUR DONORS

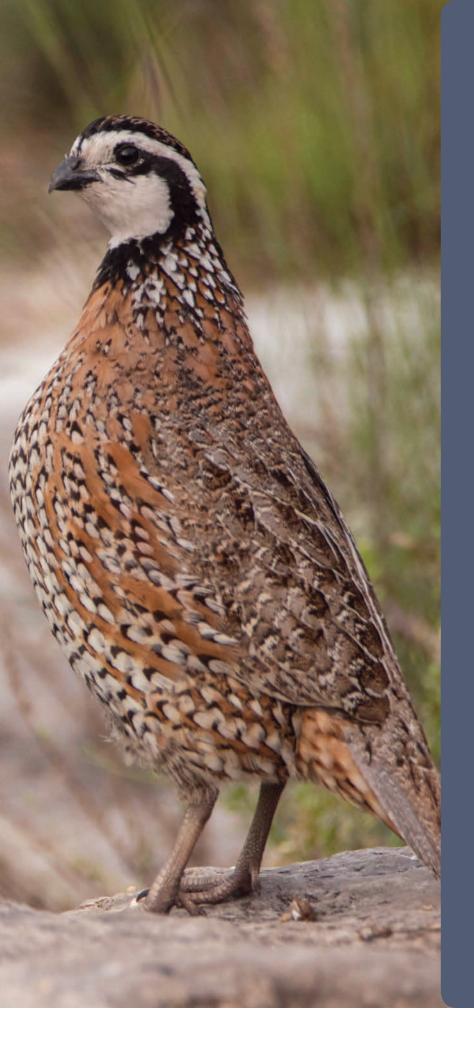

We want to thank all of our annual donors who continue to support and believe in the mission of the Caesar Kleberg Wildlife Research Institute. Your generous gifts help to advance the vision that Mr. Caesar had so long ago; to protect and conserve wildlife and habitat through innovative management techniques.

Your generosity provides essential support for research initiatives, graduate student education, cutting-edge technology, and crucial infrastructure that is needed by a world-class research institute. We are grateful for your contributions and commitment to CKWRI.

### LOOKING TO THE FUTURE

The Caesar Kleberg Wildlife Research Institute has made a positive impact on the art and science of wildlife management, regionally, nationally, and internationally. Strong, forward-thinking leadership coupled with excellent faculty have kept the Institute on the cutting edge. We, at the Institute, wish to maintain this advantage as we look to the future and address wildlife and conservation concerns in the 21st Century.

With your help, we can pursue the future with confidence knowing that we are doing everything possible to provide the best for wildlife and conserve this important natural resource for future generations to enjoy.

# TABLE OF CONTENTS

- 5 From the Chairman of the Board
- **Annual Giving**
- 10 Caesar Kleberg Partner Program
- From the Executive 11 Director
- 12 In-Kind Donors
- 14 From the Director of Development
- 16 Named Endowments
- 18 Endowment Donors
- 20 Prestigious Scholarships & Fellowships
- 22 Our Students

# ABOUT THE INSTITUTE

The Caesar Kleberg Wildlife Research Institute at Texas A&M University-Kingsville is the leading wildlife research organization in Texas and one of the finest in the nation. Established in 1981 by a grant from the Caesar Kleberg Foundation for Wildlife Conservation, the Institute operates as a nonprofit organization and depends financially upon private contributions and faculty grantsmanship.

### **OUR MISSION**

To provide science-based information for enhancing the conservation and management of wildlife in South Texas and related environments.

### RESEARCH FOCUS

#### WILDLIFE BIOLOGY, ECOLOGY, AND MANAGEMENT

- The Richard M. Kleberg, Jr.
   Center for Quail Research
  - Deer Research Program
- Feline Research Program
- Waterfowl and Wetland
   Birds Research Program
- Geospatial Technologies
   Laboratory
- Wildlife Diseases, Parasitology, and Toxicology

#### HABITAT MANAGEMENT AND RESTORATION

- Semi-arid Land Ecology
- Invasive Grasses Research
  - Fire Ecology Research
    - South Texas Natives
       Texas Native Seeds
- On Campus Federal Partner:
  USDA-NRCS (Kika de la Garza
  Plant Materials Center)
  - Livestock Grazing as a Management Tool

# FROM THE **CHAIRMAN** OF THE BOARD

Knowledge is priceless but not free. Knowledge is earned through experience and through the efforts of researchers who study how the world works. The Caesar Kleberg Wildlife Research Institute excels because it works closely with wildlife managers to learn from their experiences and engages the best and brightest faculty and students to conduct applied research. Institute scientists close the knowledge circle by sharing what they learn with wildlife and land managers and the scientific community.

The Institute's success at generating, gathering, and sharing knowledge is dependent on support provided by those recognized in this Annual Giving Report. The list of supporters is long and, as Chair of the Advisory Board, I wish to thank them all. Everyone who cares about wildlife in Texas benefits directly from the knowledge made possible by these gifts. Good wildlife and habitat management benefits all the state's citizens through improved water, air, soil, and all the other ecosystem components that enrich our lives.

Members of the CKWRI Advisory Board serve passionately because they recognize the value of wildlife research and the benefits of sound wildlife management. This last year brought 3 prominent changes to the Institute's advisory board. First, the CKWRI Advisory Board and all of Texas lost a stalwart of wildlife conservation with the passing of Tim Hixon last summer. Tim had been a member of the Institute's advisory board for over 20 years. Tim and his wife, Karen, supported the Institute with their time, treasure, and talents. They opened the Hixon Ranch to research on quail and native plants, generating a great deal of knowledge, to the benefit of all South Texas landowners.

This summer, 2 of the Advisory Board's longest serving members made the decision to retire from the board. Dick Jones and Jim McAllen both served on the Board for 35 years. They each represented multi-generational ranching interests in South Texas and therefore the heart and soul of wildlife conservation in the region. They funded research, shared their experiences, and opened their ranches to research. The CKWRI and the Advisory Board are honored to have benefited from Dick's and Jim's guidance and support for over 3 decades.

We deeply appreciate all the donors listed in this report and trust all our supporters to help us keep the river of knowledge flowing from the CKWRI. We produce this knowledge to help you conserve and manage the wildlife and habitat that means so much to everyone in our great state.

Sincerely,

David W. Killam

Parid W. Killam

### ANNUAL GIVING

#### **CKWRI PATRONS**

CKWRI Patrons generously donated more than \$5,000 to the Institute for operating purposes.

# CAESAR KLEBERG PARTNER PROGRAM

The Touch Point - watercolor by Mark Kohler

# WHO IS ELIGIBLE TO BECOME A CAESAR KLEBERG PARTNER?

Partner members contribute gifts of \$5,000 or more annually to the Caesar Kleberg Wildlife Research Institute to help us advance wildlife science and educate future conservation leaders. Caesar Kleberg Partners will be recognized and honored as our generous and loyal annual donors.

# WHAT ARE THE BENEFITS OF BEING A CAESAR KLEBERG PARTNER?

- VIP seminars and receptions
- Invitations and complimentary registration to Institute-hosted events
- Special recognition at Institute-hosted events and in the Institute's annual giving report
- Opportunity for a personal, half day, one-on-one visit with an Institute science team member at your ranch
- Opportunity to direct up to \$2,000 of your Caesar Kleberg Partner contribution to a specific research program within the Institute
- Caesar Kleberg Partners ranch gate sign

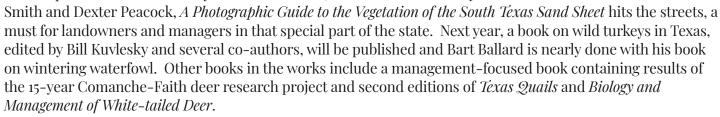

#### WHAT DO ANNUAL GIFTS SUPPORT?

Dollars raised will support research programs, including new emerging areas such as Habitat Restoration, Invasive Grasses, and Wildlife Health. Additionally, gifts will support:

- **STUDENTS**: providing funds for our graduate students to attend scientific meetings to present their work.
- **SCIENTIFIC JOURNAL PUBLICATIONS:** funding the publication of the Institute's work in top scientific journals.
- MAINTENANCE OF CUTTING EDGE LABORATORIES AND FACILITIES: supporting technology upgrades and maintenance of equipment and facilities.
- INSTITUTE REPORTS AND PUBLICATIONS: ensuring the Institute can continue to distribute findings to the public through our printed and electronic publications.

FROM THE EXECUTIVE DIRECTOR

This report comes to you at an exciting time for the Caesar Kleberg Wildlife Research Institute. Last year we graduated 20 M.S. and Ph.D. students, more students than many university wildlife departments have in their entire program. CKWRI faculty continue to produce books that benefit landowners, wildlife managers, and scientists. Scott Henke published two books, *American Alligators: Habitats, Behaviors, and Threats* and, with Alan Fedynich, *Aflatoxins and Wildlife: Exposure, Problems, Detection and Control Methods*. Lenny Brennan edited a book *Quantitative Analyses in Wildlife Science* that will be available to wildlife professionals later this year. In November, a book co-authored by Forrest

The CKWRI's Texas Native Seeds program reached a milestone last year when it hired Tyler Wayland in East Texas and Doug Jobes in the Coastal Prairies. With this expansion, the TNS program is now statewide and landowners, agencies, and industries anywhere in the state will be able to restore native plants with locally adapted seeds.

This spring, Mike Tewes distilled knowledge from his 35 years of studying ocelots in South Texas into an hour-long Faculty Lecture. Because of his lecture, excitement about ocelot conservation is at an all-time high. Working with the East Foundation, local landowners, and other partners, the CKWRI is channeling this excitement into new initiatives for ocelot recovery.

Using resources from a generous grant provided by the Frank Bremner Charitable Trust, the Wildlife Photography program awarded its first certificate in Wildlife Photography to Kelley Wood. Undergraduate and graduate students have learned how to take professional-quality photographs to document their research and share the wonder of the wild world they study and love.

On the personnel side, Tim Fulbright stepped out of the Meadows Professorship for Semiarid Land Ecology but is still a CKWRI scientist writing results of his nearly 40 years of research. The CKWRI is in the process of recruiting a new Meadows Professor. This year we hired a scientist to fill the Stedman Chair for White-tailed Deer Research. Dr. Mike Cherry will start that position later this year, bringing his high-energy, impactful research program to South Texas.

All of this and our many other accomplishments are possible because of your support. Whether you gave a single gift, are an annual donor, or have helped secure the CKWRI's long-term finances with an endowment gift, your support helps us provide the knowledge needed to manage our state's wildlife and enables the CKWRI to produce the next generation of wildlife managers. Our gratitude runs deep and we would be honored if you choose to continue supporting the great work of the Caesar Kleberg Wildlife Research Institute.

All the Best from South Texas.

David Hewitt

Flint Hills Resources

Good research in the sciences can take a long time. Great research in the natural world can take even longer. The following is a story about two of our scientists, Scott Henke and Alan Fedynich, who had a long range vision about a problem and then set out to discover all facets about it over a 15–20 year horizon. It is also a story about how important private support and passionate donors made this happen.

Back about 2 decades ago, our good friends Ben Vaughan III and the late Tim Hixon, were very concerned about a toxin called "aflatoxin". I vividly remember when I first went to Kingsville and received phone calls from very concerned landowners who had witnessed birds of all kinds dying on their ranch. We surmised it might have been from corn fed randomly, which likely had very high levels of aflatoxin. Tim and Ben said "we will fund this work as long as it takes to get to the root of it". That was 1999 and today, in May of 2019, I received a copy in the mail of a new book *Aflatoxins and Wildlife: Exposure, Problems, Detection and Control Methods* by Henke and Fedynich. This book is a compilation of research that spanned almost two decades.

What you need to know is that this important work was not popular research to be funded by federal or state agencies, NGO's, or most private foundations and certainly not your local CO-OP and their seed suppliers. And of course not, if it had to run more than 3 years, which is a normal funding life span for most projects. Tim and Ben saw the need was met with their private dollars and never gave up or looked back. And our great research team of Scott and Alan never faltered in delivering on important work over this remarkable time frame. It took both passionate donors and dedicated scientists. This is the fundamental nature of our work at the Caesar Kleberg Wildlife Research Institute. Generous donors who make a long term commitment and scientists who "under-promise and over-deliver".

Thanks to all of you who have been steadfast supporters with your annual donations or in establishing an endowment. The truth is, this is how great research will be accomplished in the natural world we all care so much about.

Sincerely,

Fred C. Bryant

Director of Development

Tel C. Beyout

# ABOUT ENDOWMENTS AT CKWRI

Investing in an endowment at the Caesar Kleberg Wildlife Research Institute gives us the permanent support to ensure the future of wildlife and their habitat in South Texas and beyond.

#### WHAT DO ENDOWED FUNDS **MEAN FOR CKWR!?**

By supporting or creating endowments you specifically help us to:

- 1. LEVERAGE RESEARCH FUNDS from other organizations such as state and federal agencies, NGOs, and private foundations that require a matching gift in order to fund a project.
- 2. RECRUIT TOP GRADUATE STUDENTS through the prestige of named fellowships.
- 3. ADD VALUE TO EXISTING PROJECTS by bringing additional support to expand research into areas not currently covered.
- 4. DEVELOP POST-DOCTORAL POSITIONS to support, expand, and strengthen research in our areas of focus.
- 5. **ENDOW FACULTY POSITIONS** to ensure the important research conducted at the Institute continues and is not dependant on outside funding.

#### **WAYS TO GIVE TO ENDOWMENTS**

#### **CASH DONATION**

Many donors choose to make a one-time gift using cash, check, or credit card. A gift of any amount may be directed to any of our research programs.

#### MULTI-YEAR INSTALLMENTS

Multi-vear installments are available to those donors who wish to make a pledge and divide their gift over 3 to 5 years.

#### APPRECIATED STOCK

You may choose to support our campaign through stock contributions.

#### ESTATE PLANNING

Gifts made to the Institute through your estate are an option that you might consider as the right choice for you and your family.

### ESTATE PLANNING GIFTS ANNOUNCED

We are pleased to announce that the CKWRI is a designated recipient of estate intentions from 2 families of distinguished philanthropists, Tio and Janell Kleberg and Chuck and Amy Schultz.

The Kleberg's have made provisions in their estate to support the CKWRI Wildlife Park Endowment and the Schultz's have intentions to support the CKWRI with a gift from their estate.

We at the CKWRI are honored by the support of the Kleberg's and the Schultz's that will benefit the CKWRI well into the future.

Top - Tio and Janell Kleberg (left) with former TAMUK President, Steven Tallant (right).

Bottom - Chuck and Amy Schultz (center) with Brad Walker, V.P. for Institutional Advancement (far left), former TAMUK President Steven Tallant (second from right), and General Ricardo Sanchez (ret.), TAMUK Foundation Board Chair.

STUDENT HIGHLIGHT

Kristvn Stewart, Master of Science candidate

Hometown: Chatfield, Texas

Project: Influence of Juniper on Habitat Use and Demography of Montezuma Quail in the Edwards Plateau of Texas

Kristyn has always had a passion for wildlife. It grew as she graduated high school and upon completing her Bachelor of Science degree from Tarleton State University, her passion became rooted in a scientific perspective. She is currently working towards her Master's degree in Range and Wildlife Management at Texas A&M University-Kingsville. She will be estimating density, seasonal survival, and determining the influence of juniper and other vegetative characteristics on Montezuma quail in the Edwards Plateau of Texas.

# **OUR STUDENTS**

The world-class program at the Caesar Kleberg Wildlife Research Institute attracts some of the brightest minds from all over the United States and beyond. Our program is unique in that we offer students the opportunity to conduct research on private lands. Because of this, our students leave with a greater appreciation for private landowners and their stewardship values.

Once they graduate, our students are some of the most sought after in the field of wildlife biology and habitat management. CKWRI graduates are working for:

American Bird Conservancy
The Center for Environmental
Management of Military Lands
Ducks Unlimited
Florida Fish and Wildlife Conservation
Idaho Fish and Game
Kansas Wildlife Service
King Ranch, Inc.
Michigan Department of Natural Resources
Michigan State University
Mississippi Department of Wildlife,

Fisheries and Parks

Montana Fish, Wildlife, and Parks
The Nature Conservancy
Pheasants Forever
Private Ranches
Rocky Mountain Bird Observatory
Texas A&M International
Texas A&M University-College Station
Texas Parks and Wildlife Department
Texas Tech University
USDA - NRCS
U.S. Fish and Wildlife Service
U.S. Forest Service

U.S. Geological Survey, Patuxent
Wildlife Research Center
U.S. Geological Survey, National
Wildlife Health Center
University of Idaho
University of San Diego
Department of Biology
Washington Department of
Fisheries & Wildlife
Welder Wildlife Foundation
Wisconsin Department of
Natural Resources

# STUDENT HIGHLIGHT

Jacob Dykes, Doctoral candidate

Hometown: Amory, Mississippi

Project: Behavioral Responses of White-tailed Deer to Heat Stress

Jacob Dykes grew up in Amory, Mississippi where he developed a passion for the outdoors. To pursue that passion and gain a better understanding of natural resources, Jacob enrolled in the Wildlife, Fisheries, and Aquaculture Science program at Mississippi State University. While at Mississippi State University, he obtained both of his bachelor's and master's of science degrees in Wildlife, Fisheries, and Aquaculture. In pursuit of his Ph.D, Jacob joined the Caesar Kleberg Wildlife Research Institute in August 2018, to lead a research project evaluating Behavioral Responses of White-tailed Deer to Heat Stress.

# 2018 M.S. & PH.D. GRADUATES

#### ANGELICA ARREDONDO, M.S.

Thesis - Evaluation of the Success and Effectiveness of the Welder Wildlife Foundation's Rangelands Curriculum

#### ANDREA BRUNO, Ph.D.

Thesis - Northern Bobwhite Population Densities in Relation to Experimental Grazing Regimes in South Texas

#### VICTORIA HAYNES, M.S.

Thesis - Comparison of Seasonal Patch Burning in Cordgrass Communities on Livestock Distribution and Forage Nutrition

#### ONALISE HILL, M.S.

Thesis - White-tailed Deer Density Effects on Selected Woody Plant Species and Habitat Use by Male Deer

#### MASAHIRO OHNISHI, Ph.D.

Thesis - Effects of selective harvest on demographic, genotypic, and phenotypic traits in male white-tailed deer

#### JANEL L. ORTIZ, Ph.D.

Thesis - Conserving South Texas Birds Through the Development of GK-12 Curriculum and Citizen Science

#### LINDSEY PHILLIPS, M.S.

Thesis - Effects of varying white-tailed deer and supplemental feeder site densities on woody vegetation in a semi-arid environment

#### MICHAELA F. RICE, M.S.

Thesis - Population parameters and stress in white-tailed deer in South Texas

#### RYAN M. ROTHSTEIN, M.S.

Thesis - Effect of Deer Density on Antler Growth

#### GAEL A. SANCHEZ, M.S.

Thesis - Landscape-Genetic Analyses of Mule Deer to Guide Management for Chronic Wasting Disease in Texas

#### EMILY D. WELLS, M.S.

Thesis - Habitat Use by Sandhill Cranes in Texas

#### SAMANTHA WOLFE, M.S.

Thesis - Investigating Migratory Songbird Habitat Associations in South Texas Caesar Kleberg Wildlife Research Institute Texas A&M University - Kingsville 700 University Blvd., MSC 218 Kingsville, Texas 78363
